THE JOURNAL OF HAND SURGERY

British Volume 16B 1991

Author index

A

Abdel-Salam, A., Eyres, K. S. and Cleary, J. Drivers' elbow: a cause of ulnar neuropathy, 436–437
Agee, J., McCarroll, H. R. and Hollister, Anne. The anatomy of the flexor digitorum superficialis relevant to tendon transfers, 68–69
Al-Qattan, M. M. and Husband, J. B. Median nerve compression by the supracondylar process: a case report, 101–103
Al-Qattan, M. M. and Murray, K. A. The arcade of Struthers: an anatomical study, 311–314
Alfarano, M. *With* Luchetti, 415–419
Altissimi, M., Mancini, G. B. and Azzara, A. Results of primary repair of digital nerves, 546–547
Amis, A. A. *With* Mashadi, 35–39
An, K.-N., Linscheid, R. L. and Brand, P. W. Correlation of physiological cross-sectional areas of muscle and tendon, 66–67
Andersen, K. *With* Langhoff, 454–459
Anderson, G. A., Lee, V. and Sundararaj, G. D. Extensor indicis proprius opponensplasty, 334–338
Ando, M. *With* Takami, 70–71
Andrew, J. G., Andrew, S. M., Ash, A. and Turner, B. An investigation into the role of inflammatory cells in Dupuytren's disease, 267–271
Andrew, J. G. Contracture of the proximal interphalangeal joint in Dupuytren's disease, 446–448
Andrew, J. G. and Kay, N. R. M. Segmental aponeurectomy for Dupuytren's disease: a prospective study, 255–257
Andrew, S. M. *With* Andrew, 267–271
Ansell, B. M. *With* Evans, 293–304
Anttila, S. *With* Mäkelä, 272–274
Arnež, Z. M., Kersnič, M., Smith, R. W. and Godina, M. Free lateral arm osteocutaneous neurosensory flap for thumb reconstruction, 395–399
Ash, A. *With* Andrew, 267–271
Azzara, A. *With* Altissimi, 546–547

B

Backman, C., Nyström, A. and Backman, C. Cold-induced arterial spasm after digital amputation, 378–381
Backman, C. *With* Backman, 378–381
Backman, C. *With* Nyström, 389–391
Bajec, J. *With* Solinc, 162–164
Bale, R. S. *With* Parkinson, 208–211
Barbieri, C. H. *With* Deffino, 40–46
Barfred, T. *With* Lundkvist, 32–34
Barton, N. J. An editor's view: living with deadlines (editorial), 361–367
Barton, N. J. *With* Belliappa, 212–214
Bear, J. N. *With* Wienand, 465–466
Beasley, R. W. *With* Chiu, 505–510
Bell, M. J. *With* Gibson, 113
Belliappa, P. P. and Barton, N. J. Hand injuries in cricketers, 212–214
Bhagia, S. P. *With* Bhattacharya, 342–345
Bhatnagar, S. K. *With* Bhattacharya, 342–345
Bhattacharya, S., Bhagia, S. P., Bhatnagar, S. K., Pandey, S. D. and Chandra, R. The medial upper arm fasciocutaneous flap, 342–345
Bickerstaff, D. R., O'Doherty, D. P. and Kanis, J. A. Radiographic changes in algodystrophy of the hand, 47–52
Blair, Vera. Flexion gap measurement, 225
Blair, W. F. *With* El-Gammal, 382–385
Bolton, H. Founders of hand surgery: The Chicago School of Hand Surgeons, 116–117
Boonzaier, A. C. *With* Mennen, 197–201
Bos, K. E. *With* Ritt, 98–100
Bowden, Ruth E. M. *With* Pereira, 519–523
Bradley, Mary. *With* Burke, 13–18
Brand, P. W. *With* An, 66–67
Braun, F. M. *With* Foucher, 25–29, 56–60
Brock-Utne, J. G. *With* Mars, 318–322
Bromley, Linda. *With* Murrell, 263–266
Brooks, D. Founders of hand surgery: Sir Herbert Seddon, 223–224
Brunelli, G. A. and Brunelli, G. R. A fourth type of brachial plexus lesion: the intermediate (C7) palsy, 492–494
Brunelli, G. A. and Brunelli, G. R. A personal technique for treatment of scaphoid non-union, 148–152
Brunelli, G. R. *With* Brunelli, 148–152, 492–494
Buch, N. *With* Foucher, 25–29
Burge, P. and Todd, B. Computer-aided localisation of peripheral nerve lesions, 19–24
Burke, F. D., Dias, J. J., Lunn, P. G. and Bradley, Mary. Providing care for hand disorders: trauma and elective (The Derby Hand Unit Experience 1989–1990), 13–18
Burke, F. D. *With* Crawford, 153–155
Burrows, C. *With* Gillies, 94–95

C

Cahill, S. L. *With* Rayan, 515–518
Carlson, S. *With* Kaarela, 386–388
Carlstedt, T. Experimental studies on surgical treatment of avulsed spinal nerve roots in brachial plexus injury, 477–482
Carmichael, S. W. *With* Spinner, 315–317
Caroli, A., Zanasi, S., Marcuzzi, A., Guerra, D., Cristiani, G. and Pasquali Ronchetti, I. Epidemiological and structural findings supporting the fibromatous origin of dorsal knuckle pads, 258–262
Chandra, R. *With* Bhattacharya, 342–345
Chandraprakasam, T. *With* Percival, 141–143
Chandraprakasam, T. *With* Sykes, 144–147
Chen, L. *With* Chiu, 505–510
Cheng, J. C. Y. Distraction lengthening of the forearm, 441–445
Cherubino, P. and Pilato, G. Intra-tendinous chondroma of a flexor tendon, 462–463
Chiu, D. T. W., Chen, L., Spielholtz, N. and Beasley, R. W. A comparative electrophysiological study on neurotisation in rats, 505–510
Chiu, K. Y. *With* Chow, 137–140

Subject index

A

Abnormalities
- constriction band syndrome
  - peripheral nerve palsy associated with congenital constriction band syndrome, 109–112
- Madelung's deformity
  - spontaneous ruptures of the extensor tendons of the fingers in Madelung's deformity, 329–333
- pollicisation of the index finger in congenital anomalies, 144–147
- syndactyly
  - a double pulp flap technique for creating nail folds in syndactyly release, 32–34

Accessory nerves
- accessory nerve injury: conservative or surgical treatment?, 531–536

Accidents, occupational
- does training reduce the risk of industrial hand injuries?, 323–326
- the prevention of hand injuries, 239
- rupture of the extensor digitorum communis tendons caused by occupational overuse, 70–71

Algodystrophy
- radiographic changes in algodystrophy of the hand, 47–52

Amputation
- absence of ulnar drift in a rheumatoid hand with partial amputation of the digits, 280–282
- cold-induced arterial spasm after digital amputation, 378–381
- transmetacarpal replantation of the right hand onto the left, 392–394

Anatomy, regional
- anatomical demonstration of the nerve supply to the flexor tendon, 92–93
- anatomy, descriptive and surgical, 240–242
- the anatomy of the flexor digitorum superficialis relevant to tendon transfer, 68–69
- the arcade of Struthers: an anatomical study, 311–314
- the superficial anastomosis on the palm of the hand between the ulnar and median nerve, 511–514
- ulnar nerve palsy following fractures of the distal radius: clinical and anatomical studies, 438–440
- uncommon number and distribution of the Pacinian corpuscles in a human hand, 89–91

Angiography
- arteriographic findings in radial and ulnar deficiencies, 409–412

Antibiotics
- human fight-bite injuries of the hand, 431–435

Arcade of Struthers
- the arcade of Struthers: an anatomical study, 311–314

Arm
- surgical treatment for upper motor neurone lesions, 123–124
- *see also* Forearm

Arteries
- abnormalities
  - arteriographic findings in radial and ulnar deficiencies, 409–412
- grafts
  - replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391
- pathology
  - cold-induced arterial spasm after digital amputation, 378–381
  - digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
- physiopathology
  - effects of perivascular sympathectomy on distal adrenergic innervation in the hands of monkeys, 386–388

Arteriography *see* Angiography

Arthritis
- basal joint
  - surgical management of basal joint disease of the thumb, 368–369
- juvenile
  - the wrist in juvenile arthritis, 293–304

rheumatoid
absence of ulnar drift in a rheumatoid hand with partial amputation of the digits, 280–282
the Nicolle finger joint prosthesis: a reappraisal, 187–190
the rheumatoid wrist: patterns of disease progression, 275–279
spontaneous rupture of the flexor carpi radialis tendon, 72–74
see also Osteoarthritis
Arthrodesis
a long-term review of the Harrison-Nicolle peg in digital arthrodesis, 283–285
Arthropathy
tumourous deposition of calcium pyrophosphate dihydrate crystals in the wrist, 219–222
Arthroplasty
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
long-term follow-up of the cemented Caffinière prosthesis for trapezio-metacarpal arthroplasty, 428–430
silastic implant arthroplasty for post-traumatic stiffness of the finger, 286–292
Authors
an author's view: living with rejection, 359–360
an editor's view: living with deadlines, 361–367
Avulsion
experimental studies on surgical treatment of avulsed spinal nerve roots in brachial plexus injury, 477–482
the management of the complete ring avulsion injury, 413–414
replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391

B

Bandages
the effect of tourniquet release on intra-compartmental pressure in the bandaged and unbandaged limb, 318–322
shock absorbing finger cap, 30–31
Basal joint arthritis *see* Arthritis, basal joint
Bites *see* Injuries, bites
Blood circulation
the effect of tourniquet release on intra-compartmental pressure in the bandaged and unbandaged limb, 318–322
effects of compression and devascularisation on ulnar nerve function, 104–108
Raynaud's phenomenon of occupational origin, 370–377
the use of streptokinase in replant salvage, 53–55
vascularised bone transfer for defects and pseudarthroses of forearm bones, 406–408
Blood vessels
an investigation into the role of inflammatory cells in Dupuytren's disease, 267–271
arteriographic findings in radial and ulnar deficiencies, 409–412
cold-induced arterial spasm after digital amputation, 378–381
digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
effect of perivascular sympathectomy on distal adrenergic innervation in the hands of monkeys, 386–388
reconstruction of the distal phalanx of the fingers by free toe-to-hand transfer, 169–174
replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391
vascularised nerve grafts, 483–488
Bone
a diagnostic problem in tuberculous dactylitis, 202–203
graft
the use of totally de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155
vascularised bone transfer for defects and pseudarthroses of forearm bones, 406–408
heterotopic ossification in a finger following head injury, 217–218
osteosarcoma of a phalanx, 204–207
Book reviews
A Colour Atlas of Hand Disorders (by G. Hooper), 117
An Atlas of Forearm and Cross-sectional Anatomy (by R. A. Meals and L. L. Seeger), 352
An Atlas of Surgical Exposures of the Upper Extremity (by Tubiana, McCullough and Masquelet), 117–118
Atlas of Orthopaedic Surgery Vol. II—Upper Extremity (edited by C. A. Laurin, L. H. Riley and R. Roy-Camille), 229
Atlas of Reconstructive Microsurgery (edited by M. B. Wood), 228
Burn Reconstruction (by B. M. Achauer), 468
Classification of Fractures of Long Bones (by M. E. Muller, S. Nazarian, P. Koch and J. Schatzker), 228–229
Controversies in Hand Surgery (edited by R. J. Neviaser), 117
Dupuytren's Disease—Hand and Upper Limb Series (edited by R. M. McFarlane, D. A. McGrouther and M. H. Flint), 353
Flynn's Hand Surgery (edited by J. Jupiter), 468–469
Fundamental Techniques of Plastic Surgery (by I. McGregor), 228
Joint Replacement Arthroplasty (edited by B. F. Morrey), 467
Microsurgical Reconstruction of the Extremities (by L. Gordon), 118
Nails: Therapy, Diagnosis, Surgery (by Scher and Daniel), 228
Occupational Hand and Upper Extremity Injuries and Diseases (edited by M. L. Kasdan), 469
Operative Approaches in Orthopedic Surgery and Traumatology (by R. Bauer, F. Kerschbaumer and S. Poisel), 117
Orthopaedic Anatomy and Surgical Approaches (edited by F. W. Reckling, J. A. B. Reckling and M. P. Mohn), 467
Outline of Orthopaedics (by J. Crawford Adams and D. L. Hamblen), 229–230
Reconstruction of the Child's Hand (edited by P. R. Carter), 352–353
Sports Injuries (edited by M. A. Hutson), 467–468
The Fractured Scaphoid (by T. J. Herbert), 230
Year Book of Hand Surgery 1990 (edited by J. H. Dobyns, R. A. Chase and P. C. Amadio), 352
Year Book of Plastic, Reconstructive and Aesthetic Surgery 1990 (edited by S. H. Miller), 352
Boonzaaier, Andries Coetzee: Founders of hand surgery, 465–466
Brachial plexus
experimental studies on surgical treatment of avulsed spinal nerve roots in brachial plexus injury, 477–482
a fourth type of brachial plexus lesion: the intermediate (C7) palsy, 492–494
malignant schwannoma of the brachial plexus: a lesson in presentation, 113
obstetrical brachial plexus lesions, 489–491
Burns
severe burns of the hand: a practical guide to their management, 6–12

C

Caird, Douglas (Dougal) McKenzie (obituary), 354–355
Calcification
acute calcific tendinitis in the hand and wrist, 215–216
Calcium pyrophosphate
tumourous deposition of calcium pyrophosphate dihydrate crystals in the wrist, 219–222
Carpal tunnel
primary palmaris longus transfer as an opponensplasty in carpal tunnel release, 56–60

Carpal tunnel syndrome
neurophysiological assessment of the early phases of carpal tunnel syndrome with the inching technique before and during operation, 415–419
simultaneous carpal tunnel release and Dupuytren's fasciectomy, 175–178
Carpo-metacarpal joint
first metacarpal osteotomy for carpo-metacarpal osteoarthritis, 424–427
Charcot-Marie-Tooth disease
the hand in Charcot-Marie-Tooth disease, 191–196
Chondroma
intra-tendinous chondroma of a flexor tendon, 462–463
Collagen
the collagen changes of Dupuytren's contracture, 263–266
Compartment syndrome
compartment syndrome in transferred muscle: an unusual complication, 75–77
Computers
computer-aided localisation of peripheral nerve lesions, 19–24
computers in hand surgery, 3–5
Congenital defects *see* Abnormalities
Constriction
peripheral nerve palsy associated with congenital constriction band syndrome, 109–112
progressive constriction band caused by black magic thread, 349
Contractures
surgical treatment of fixed flexion contractures in the hands of institutionalised patients, 449
two flaps to resurface the basal flexion-crease of the finger area, 78–83
see also Dupuytren's contracture

D

Digital nerves
anatomical demonstration of the nerve supply to the flexor tendon, 92–93
comparison of results of repair of digital nerves by denatured muscle grafts and end-to-end sutures, 519–523
results of primary repair of digital nerves, 546–547
Dislocations
double dislocations of digits, 114–115
Distal interphalangeal joint
accessory roles of the vinculum breve of the flexor digitorum profundus and check-rein ligaments at the distal interphalangeal joint, 305–310
Drug therapy
the use of streptokinase in replant salvage, 53–55
Dupuytren's contracture
an investigation into the role of inflammatory cells in Dupuytren's disease, 267–271
the collagen changes of Dupuytren's contracture, 263–266
contracture of the proximal interphalangeal joint in Dupuytren's disease, 446–448
Dupuytren's contracture: the long-term results after day surgery, 272–274
epidemiological and structural findings supporting the fibromatous origin of dorsal knuckle pads, 258–262
progress in Dupuytren's disease (editorial), 237–239
segmental aponeurectomy in Dupuytren's disease, 243–254
segmental aponeurectomy for Dupuytren's disease: a prospective study, 255–257
simultaneous carpal tunnel release and Dupuytren's fasciectomy, 175–178

E

Editors
an editor's view: living with deadlines, 361–367
Education
anatomy, descriptive and surgical, 240–242
does training reduce the incidence of industrial hand injuries? 323–326
Elbow
driver's elbow: a cause of ulnar neuropathy, 436–437
Elderly patients
surgical treatment of fixed flexion contractures in the hands of institutionalised patients, 449
Electrophysiology
a comparative electrophysiological study on neurotisation in rats, 505–510

F

Fascia
reconstruction of sheath with fascial graft in flexor tendon repair, 179–184
segmental aponeurectomy in Dupuytren's disease, 243–254
segmental aponeurectomy for Dupuytren's disease: a prospective study, 255–257
Fibroblasts
an investigation into the role of inflammatory cells in Dupuytren's disease, 267–271
the collagen changes of Dupuytren's contracture, 263–266
Fibroma
epidemiological and structural findings supporting the fibromatous origin of dorsal knuckle pads, 258–262
Fingers
cross-arm dermis flaps for repair of dorsal finger defects, 339–341
shock absorbing finger cap, 30–31
Flaps
cross-arm
cross-arm dermis flaps for repair of dorsal finger defects, 339–341
cross-finger
two flaps to resurface the basal flexion-crease of the finger area, 78–83
double pulp
a double pulp flap technique for creating nail folds in syndactyly release, 32–34
free
free lateral arm osteocutaneous neurosensory flap for thumb reconstruction, 395–399
free toe pulp transfer in thumb reconstruction, 165–168
indications and results of skin flaps in painful digital neuroma, 25–29
groin
the management of the complete ring avulsion injury, 413–414
island
dorsal metacarpal reverse flaps, 400–405
indications and results of skin flaps in painful digital neuroma, 25–29
local
indications and results of skin flaps in painful digital neuroma, 25–29
the medial upper arm fasciocutaneous flap, 342–345
palmar transposition, two flaps to resurface the basal flexion-crease of the finger area, 78–83
skin
indications and results of skin flaps in painful digital neuroma, 25–29

Flexion deformity
surgical treatment of fixed flexion contractures in the hands of institutionalised patients, 449
Forearm
congenital sarcoma in the forearm, 346–348
distraction lengthening of the forearm, 441–445
the medial upper arm fasciocutaneous flap, 342–345
vascularised bone transfer for defects and pseudarthroses of forearm bones, 406–408
Foreign bodies
locked finger due to foreign body in the flexor sheath, 460–461
Founders of hand surgery
Andries Coetzee Boonzaaier, 465–466
Marc Iselin, 350–351
Sir Herbert Seddon, 223–224
The Chicago School of Hand Surgeons, 116–117
Fracture fixation, internal
a personal technique for treatment of scaphoid non-union, 148–152
the use of de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155
Fractures
Colles'
radiographic changes in algodystrophy of the hand, 47–52
non-union
a personal technique for treatment of scaphoid non-union, 148–152
scaphoid non-union with D.I.S.I. deformity, 156–161
the use of de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155
open
prospective study of 245 open digital fractures of the hand, 137–140
radius
ulnar nerve palsy following fractures of the distal radius: clinical and anatomical studies, 438–440
Rolando's
Rolando's facture, 454–459
scaphoid
a personal technique for treatment of scaphoid non-union, 148–152
scaphoid non-union with D.I.S.I. deformity, 156–161
the use of de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155

G

Ganglia
nerve sheath ganglion of the superficial radial nerve, 94–95
Graft
arterial
replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391
bone
the use of totally de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155
vascularised bone transfer for defects and pseudarthroses of forearm bones, 406–408
fascia
reconstruction of sheath with fascial graft in flexor tendon repair, 179–184
full-thickness skin
the management of the complete ring avulsion injury, 413–414
muscle
comparison of results of repair of digital nerves by denatured muscle grafts and end-to-end sutures, 519–523
lack of topographical specificity in sensory nerve regeneration through muscle grafts in rats, 524–530
neurotropism, frozen muscle grafts and other conduits, 473–476
nerve
a comparative electrophysiological study on neurotisation in rats, 505–510
vascularised nerve grafts, 483–488
tendon
the fate of tendon grafts used to reconstruct the digital annular pulleys, 40–46
the use of the extensor indicis proprius as a vascularised tendon graft, 185–186
venous
replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391

H

Hand
injuries,
does training reduce the risk of industrial hand injuries?, 323–326
hand injuries in cricketers, 212–214
the prevention of hand injuries, 239
salvage of a mutilated hand using various microsurgical procedures, 162–164
see also Injuries
providing care for hand disorders: trauma and elective, 13–18

I

Implants, artificial
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
a long-term review of the Harrison-Nicolle peg in digital arthrodesis, 283–285
the Nicolle finger joint prosthesis: a reappraisal, 187–190
silastic implant arthroplasty for post-traumatic stiffness of the finger joints, 286–292
Inflammation
acute calcific tendinitis in the hand and wrist, 215–216
a diagnostic problem in tuberculous dactylitis, 202–203
Injuries
bites
human fight-bite injuries of the hand, 431–435
gunpowder
salvage of a mutiliated hand using various microsurgical procedures, 162–164
obstetric
obstetrical brachial plexus lesions, 489–491
prevention
does training reduce the risk of industrial hand injuries?, 323–326
the prevention of hand injuries, 239
ring avulsion
the management of the complete ring avulsion injury, 413–414
splinter
locked finger due to foreign body in the flexor sheath, 460–461
sports
hand injuries in cricketers, 212–214
vibration
driver's elbow: a cause of ulnar neuropathy, 436–437
Interosseous nerves
a very large neurilemmoma of the anterior interosseous nerve, 98–100
Ischaemia
digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
Iselin, Marc: Founders of hand surgery, 350–351

J

Joint
prosthesis
long-term follow-up of the cemented Caffinière prosthesis for trapezio-metacarpal arthroplasty, 428–430
a long-term review of the Harrison-Nicolle peg in digital arthrodesis, 283–285
the Nicolle finger joint prosthesis: a reappraisal, 187–190
silastic implant arthroplasty for post-traumatic stiffness of the finger joints, 286–292
stability
the function of the abductor pollicis longus muscle as a joint stabiliser, 420–423
see also Dislocations: Specific named joints

K

Kienbock's disease
the influence of age and sex on ulnar variance, 84–88

L

Ledderhose's disease
epidemiological and structural findings supporting the fibromatous origin of dorsal knuckle pads, 258–262
Ligaments
accessory roles of the vinculum breve of the flexor digitorum profundus and check-rein ligaments at the distal interphalangeal joint, 305–310
scaphoid non-union with D.I.S.I. deformity, 156–161

M

Macrophages
an investigation into the role of inflammatory cells in Dupuytren's disease, 267–271
Magnetic resonance spectroscopy
denervation of the rabbit hind limb studied by 31-phosphorus magnetic resonance spectroscopy, 537–545
Mechanoreceptors
uncommon number and distribution of the Pacinian corpuscles in a human hand, 89–91
Median nerve
a case of bipartite median nerve at the wrist, 96–97
median nerve compression by the supracondylar process: a case report, 101–103
the superficial anastomosis on the palm of the hand between the ulnar and median nerve, 511–514
Metacarpal
first metacarpal osteotomy for carpo-metacarpal osteoarthritis, 424–427
Metacarpo-phalangeal joint
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
the Nicolle finger joint prosthesis: a reappraisal, 187–190
Microsurgery
reconstruction of the distal phalanx of the fingers by free toe-to-hand transfer, 169–174
salvage of a mutilated hand using various microsurgical procedures, 162–164
Motor neurones
surgical treatment for upper motor neurone lesions, 123–124
Movement
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
flexion gap measurement, 225
the function of the abductor pollicis longus muscle as a joint stabiliser, 420–423
silastic implant arthroplasty for post-traumatic stiffness of the finger, 286–292
Muscle
abductor pollicis longus
function of the abductor pollicis longus muscle as a joint stabiliser, 420–423
chondroepitrochlearis
infraclavicular ulnar nerve entrapment due to a chondroepitrochlearis muscle, 315–317
deltoid
an improved technique of posterior deltoid to triceps transfer in tetraplegia, 197–201
denervation
denervation of the rabbit hind limb studied by 31-phosphorus magnetic resonance spectroscopy, 537–545
flexor digitorum profundus
accessory roles of the vinculum breve of the flexor digitorum profundus and check-rein ligaments at the distal interphalangeal joint, 305–310
flexor digitorum superficialis
the anatomy of the flexor digitorum superficialis relevant to tendon transfer, 68–69
graft
comparison of results of repair of digital nerves by denatured muscle grafts and end-to-end sutures, 519–523
lack of topographical specificity in sensory nerve regeneration through muscle grafts in rats, 524–530
neurotropism, frozen muscle grafts and other conduits, 473–476
latissimus dorsi
compartment syndrome in transferred muscle: an unusual complication, 75–77
neurotisation, a comparative electrophysiological study on neurotisation in rats, 505–510
palmaris longus
primary palmaris longus transfer as an oppenensplasty in carpal tunnel release, 56–60
physiology
correlation of physiological cross-sectional areas of muscle and tendon, 66–67
spasticity
flexor origin release and functional prehension in adult spastic hand deformity, 133–136
heterotopic ossification in a finger following head injury, 217–218
surgery of the spastic thumb-in-palm deformity, 127–132
transfer
compartment syndrome in transferred muscle: an unusual complication, 75–77
primary palmaris longus transfer as an opponensplasty in carpal tunnel release, 56–60
triceps
an improved technique of posterior deltoid to triceps transfer in tetraplegia, 197–201

N

Nails
a double pulp flap technique for creating nail folds in syndactyly release, 32–34
Neoplasm *see* Sarcoma
Nerve
abnormalities
a case of bipartite median nerve at the wrist, 96–97
compression
driver's elbow: a cause of ulnar neuropathy, 436–437

effects of compression and devascularisation on ulnar nerve function, 104–108
infraclavicular ulnar nerve entrapment due to a chondro-epitrochlearis muscle, 315–317
median nerve compression by the supracondylar process: a case report, 101–103
peripheral nerve palsy associated with congenital constriction band syndrome, 109–112
see also Carpal tunnel syndrome
conduction
effects of compression and devascularisation on ulnar nerve function, 104–108
neurophysiological assessment of the early phases of carpal tunnel syndrome with the inching technique before and during operation, 415–419
degeneration
the hand in Charcot-Marie-Tooth disease, 191–196
graft
a comparative electrophysiological study on neurotisation in rats, 505–510
vascularised nerve grafts, 483–488
injury
accessory nerve injury: conservative or surgical treatment?, 531–536
computer-aided localisation of peripheral nerve lesions, 19–24
denervation of the rabbit hind limb studied by 31-phosphorus magnetic resonance spectroscopy, 537–545
experimental studies on surgical treatment of avulsed spinal nerve roots in brachial plexus injury, 477–482
a fourth type of brachial plexus lesion: the intermediate (C7) palsy, 492–494
nervous system
anatomical demonstration of the nerve supply to the flexor tendon, 92–93
regeneration
lack of topographical specificity in sensory nerve regeneration through muscle grafts in rats, 524–530
neurotropism, frozen muscle grafts and other conduits, 473–476
vasoactive intestinal peptide and nerve regeneration, 515–518
repair
accessory nerve injury: conservative or surgical treatment?, 531–536
applying "cell surgery" to nerve repair: a preliminary report on the first ten human cases, 499–504
comparison of results of repair of digital nerves by denatured muscle grafts and end-to-end sutures, 519–523
how exact should nerve stump coaptation be? A new answer given by "cell surgery", 495–498
obstetrical brachial plexus lesions, 489–491
results of primary repair of digital nerves, 546–547
see also Motor neurones; Peripheral nerves
Neurilemmoma
malignant schwannoma of the brachial plexus: a lesson in presentation, 113
a very large neurilemmoma of the anterior interosseous nerve, 98–100
Neuroma
indications and results of skin flaps in painful digital neuroma, 25–29

O

Obituaries
Douglas (Dougal) McKenzie Caird, 354–355
Occupational
diseases
Raynaud's phenomenon of occupational origin, 370–377
injuries *see* Accidents, occupational
Osteoarthritis
extensor tendon rupture due to osteoarthritis of the distal radio-ulnar joint, 450–453
first metacarpal osteotomy for carpo-metacarpal osteoarthritis, 424–427
Rolando's fracture, 454–459
Osteosarcoma *see* Sarcoma
Osteotomy
first metacarpal osteotomy for carpo-metacarpal osteoarthritis, 424–427

P

Pain
digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
Paralysis
a fourth type of brachial plexus lesion: the intermediate (C7) palsy, 492–494
obstetrical brachial plexus lesions, 489–491
peripheral nerve palsy associated with congenital constriction band syndrome, 109–112
ulnar nerve palsy following fractures of the distal radius: clinical and anatomical studies, 438–440
Peripheral nerves
computer-aided localisation of peripheral nerve lesions, 19–24
peripheral nerve palsy associated with congenital constriction band syndrome, 109–112
Peyronie's disease
epidemiological and structural findings supporting the fibromatous origin of dorsal knuckel pads, 258–262
Physiotherapy
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
Pollicisation
a method of assessment of pollicisation, 141–143
pollicisation of the index finger in congenital anomalies, 144–147
Prosthesis
long-term follow-up of the cemented
Caffinière prosthesis for trapezio-metacarpal arthroplasty, 428–430
the Nicolle finger joint prosthesis: a reappraisal, 187–190
Proximal interphalangeal joint
contracture of the proximal
interphalangeal joint in Dupuytren's disease, 446–448
epidemiological and structural findings supporting the fibromatous origin of dorsal knuckle joint, 258–262
Pseudarthrosis
vascularised bone transfer for defects and pseudarthroses of forearm bones, 406–408
Pulleys *see* Tendons, pulleys

R

Radial nerve
nerve sheath ganglion of the superficial radial nerve, 94–95
Radio-ulnar joint
extensor tendon rupture due to osteoarthritis of the distal radio-ulnar joint, 450–453
Radiography
radiographic changes in algodystrophy of the hand, 47–52
the rheumatoid wrist: patterns of disease progression, 275–279
Radius
arteriographic findings in radial and ulnar deficiencies, 409–412
distraction lengthening of the forearm, 441–445
ulnar nerve palsy following fractures of the radius: clinical and anatomical studies, 438–440

Raynaud's disease
Raynaud's phenomenon of occupational origin, 370–377
Rehabilitation
an improved technique of posterior deltoid to triceps transfer in tetraplegia, 197–201
flexor origin release and functional prehension in adult spastic hand deformity, 133–136
two flaps to resurface the basal flexion-crease of the finger area, 78–83
Replantation
replantation of the completely avulsed thumb using long arterial venous grafts, 389–391
transmetacarpal replantation of the right hand onto the left, 392–394
the use of streptokinase in replant salvage, 53–55
Revascularisation
the use of streptokinase in replant salvage, 53–55
Rheumatoid arthritis *see* Arthritis, rheumatoid
Rings, removal of
removal of a tight ring by the rubber band technique, 225–226
Rupture
extensor tendon rupture due to osteoarthritis of the distal radio-ulnar joint, 450–453
post-traumatic rupture of the extensor digitorum communis tendon, 327–328
rupture of the extensor digitorum communis tendons caused by occupational overuse, 70–71
spontaneous rupture of the flexor carpi radialis tendon, 72–74
spontaneous ruptures of the extensor tendons of the fingers in Madelung's deformity, 329–333

S

Sarcoma
congenital sarcoma in the forearm, 346–348
primary osteosarcoma of a phalanx, 204–207
Scaphoid
a personal technique for treatment of scaphoid non-union, 148–152
scaphoid non-union with D.I.S.I. deformity, 156–161
the use of de-proteinised heterologous bone graft in non-union of the scaphoid, 153–155
Schwannoma *see* Neurilemmoma
Seddon, Sir Herbert: Founders of hand surgery, 223–224
Silastic implants *see* Implants, artificial
Spinal nerves
experimental studies on surgical treatment of avulsed spinal nerve roots in brachial plexus injury, 477–482
Splints
the lead hand revisited, 464
Supracondylar process
median nerve compression by the supercondylar process: a case report, 101–103
Surgeons *see* Authors: Editors: Founders of hand surgery
Sutures
comparison of results of repair of digital nerves by denatured muscle grafts and end-to-end sutures, 519–523
the effect of locking loops on the strength of tendon repair, 35–39
Sympathectomy
digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
effects of perivascular sympathectomy on distal adrenergic innervation in the hands of monkeys, 386–388
Syndactyly
a double pulp flap technique for creating nail folds in syndactyly release, 32–34

T

Technical tips
flexion gap measurement, 225
removal of a tight ring by the rubber band technique, 225–226
Techniques
applying "cell surgery" to nerve repair: a preliminary report on the first ten human cases, 499–504
a personal technique for treatment of scaphoid non-union, 148–152
Tendinitis
acute calcific tendinitis in the hand and wrist, 215–216
Tendons
extensor
extensor tendon rupture due to osteoarthritis of the distal radio-ulnar joint, 450–453
post-traumatic rupture of the extensor digitorum communis tendon, 327–328
rupture of the extensor digitorum communis tendons caused by occupational overuse, 70–71
spontaneous ruptures of the extensor tendons of the fingers in Madelung's deformity, 329–333
the use of the extensor indicis proprius as a vascularised tendon graft, 185–186
flexor
anatomical demonstration of the nerve supply to the flexor tendon, 92–93
the effect of locking loops on the strength of tendon repair, 35–39
the fate of tendon grafts used to reconstruct the digital annular pulleys, 40–46
intra-tendinous chondroma of a flexor tendon, 462–463
locked finger due to foreign body in the flexor sheath, 460–461
reconstruction of sheath with fascial graft in flexor tendon repair, 179–184
spontaneous rupture of the flexor carpi radialis tendon, 72–74
graft
the fate of tendon grafts used to reconstruct the digital annular pulleys, 40–46
the use of the extensor indicis proprius as a vascularised tendon graft, 185–186
innervation
anatomical demonstration of the nerve supply to the flexor tendon, 92–93
physiology
correlation of physiological cross-sectional areas of muscle and tendon, 66–67
pulleys
the fate of tendon grafts used to reconstruct the digital annular pulleys, 40–46
repair
the effect of locking loops on the strength of tendon repair, 35–39
reconstruction of sheath with fascial graft in flexor tendon repair, 179–184
rupture
extensor tendon rupture due to osteoarthritis of the distal radio-ulnar joint, 450–453
post-traumatic rupture of the extensor digitorum communis tendon, 327–328
rupture of the extensor digitorum communis tendons caused by occupational overuse, 70–71
spontaneous rupture of the flexor carpi radialis tendon, 72–74
spontaneous ruptures of the extensor tendons of the fingers in Madelung's deformity, 329–333
sheath
erratum, 227
locked finger due to foreign body in the flexor sheath, 460–461

reconstruction of sheath with fascial graft in flexor tendon repair, 179–184
transfer
an improved technique of posterior deltoid to triceps transfer in tetraplegia, 197–201
the anatomy of the flexor digitorum superficialis relevant to tendon transfer, 68–69
correlation of physiological cross-sectional areas of muscle and tendon, 66–67
extensor indicis proprius opponensplasty, 334–338
Tetraplegia
an improved technique of posterior deltoid to triceps transfer in tetraplegia, 197–201
Thrombosis
the use of streptokinase in replant salvage, 53–55
Thumb
abnormalities
pollicisation of the index finger in congenital anomalies, 144–147
blood supply
the use of streptokinase in replant salvage, 53–55
surgery
free lateral arm osteocutaneous neurosensory flap for thumb reconstruction, 395–399
free toe pulp transfer in thumb reconstruction, 165–168
a method of assessment of pollicisation, 141–143
replantation of the completely avulsed thumb using long arterial and venous grafts, 389–391
salvage of a mutilated hand using various microsurgical techniques, 162–164
surgery of the spastic thumb-in palm deformity, 127–132
surgical management of basal joint disease of the thumb, 368–369
Toes
free toe pulp transfer in thumb reconstruction, 165–168
reconstruction of the distal phalanx of the fingers by free toe-to-hand transfer, 169–174
Tourniquets
the effect of tourniquet release on intra-compartmental pressure in the bandaged and unbandaged limb, 318–322
Training *see* Education
Transplantation
reconstruction of the distal phalanx of the fingers by free toe-to-hand transfer, 169–174
salvage of a mutilated hand using various microsurgical procedures, 162–164
Trapezio-metacarpal joint
long-term follow-up of the cemented Caffinière prosthesis for trapezio-metacarpal arthroplasty, 428–430
Tuberculosis
a diagnostic problem in tuberculous dactylitis, 202–203
Tumours
soft tissue tumours of the hand, 125–126
tumourous deposition of calcium pyrophosphate dihydrate crystals in the wrist, 219–222
see also Chondroma, Neurilemmoma, Sarcoma

U

Ulcers
digital periarterial sympathectomy for ischaemic digital pain and ulcers, 382–385
Ulna
absence of ulnar drift in a rheumatoid hand with partial amputation of the digits, 280–282
arteriographic findings in radial and ulnar deficiencies, 409–412
correction of ulnar drift during silastic metacarpo-phalangeal joint arthroplasty, 61–65
distraction lengthening of the forearm, 441–445
the influence of age and sex on ulnar variance, 84–88
Ulnar nerve
the arcade of Struthers: an anatomical study, 311–314
driver's elbow: a cause of ulnar neuropathy, 436–437
effects of compression and devascularisation on ulnar nerve function, 104–108
infraclavicular ulnar nerve entrapment due to a chondroepitrochlearis muscle, 315–317
the superficial anastomosis on the palm of the hand between the ulnar and median nerve, 511–514
ulnar nerve palsy following fractures of the distal radius: clinical and anatomical studies, 438–440

V

Veins *see* Blood circulation: Blood vessels

W

Wrist
acute calcific tendinitis in the hand and wrist, 215–216
a case of bipartite median nerve at the wrist, 96–97
the rheumatoid wrist: patterns of disease progression, 275–279
tumourous deposition of calcium pyrophosphate dihydrate crystals in the wrist, 219–222
the wrist in juvenile arthritis, 293–304
